STATEMENT OF WORK – WAREHOUSE MOVE

GEOLOGY, MINERALS, ENERGY, AND GEOPHYSICS SCIENCE CENTER
SPOKANE OFFICE, SPOKANE, WA

Scope

The Contractor shall accomplish all work to supply moving materials, pack, and move records collections, file cabinets, rock samples, rock storage cabinets, and storage shelving from the U.S. Geological Survey (USGS) warehouse at 11103 E Montgomery, Spokane Valley, WA (hereafter referred to as “the warehouse”) to the basement room G30C and the second-floor rooms 201 and 233 of 904 W. Riverside Ave, Spokane, WA (hereafter referred to as “the new location”) and place the new items in USGS-designated positions in the new location. Additionally, the Contractor will accomplish all work to pack and move map cabinets from the new location to the USGS warehouse.

The contractor shall be responsible for providing all labor and materials for accomplishing the work in accordance with this Statement of Work (SOW).

Deliverables

The contents of two storage rooms at the warehouse in Spokane Valley will be moved to a new location in downtown Spokane, and three map cabinets will be moved from the new location to the warehouse. The contractor will provide any moving and packing materials needed or required by the USGS. The contractor will coordinate with USGS on any required indexing or annotation of materials prior to the move to ensure the contents are moved to the appropriate rooms and placed in the correct positions in the new location.

For the records collections, the contractor will remove document boxes and other materials from shelving. The contractor will repack materials that are in damaged boxes into new document boxes, transfer labels from the old boxes to the new boxes, and secure lids to boxes. The shelving associated with the records boxes will be disassembled, moved, and reassembled in the new location in USGS-designated positions. The contractor will then move the boxes to the new location and place them in numerical order on the reassembled shelving.

File cabinets will be shrink-wrapped so drawers will not open during the move. In the new location, shrink wrap will be removed and file cabinets placed in USGS-designated locations.

For rock samples, the contractor will package all rock samples currently stored in rock storage cabinets in boxes and/or 5-gallon buckets with padding materials to prevent breakage, keep track of which sample goes in which drawer in which cabinet, palletize the boxes and/or buckets of rock samples, shrink-wrap or strap them to the pallets for secure shipping, transport the pallets to the new location, move the pallets to the appropriate floor and room, unpack the pallets, and replace the rock samples in their original drawers and positions.

For rock cabinets, 22 are empty and on pallets that can be used for transport, and the remainder are unpalletized and can be moved however the contractor sees fit. Rock cabinets (19) containing rock samples will be emptied by the contractor as described above. The rock cabinets will be placed in specific USGS-designated positions in the new location. Contractor will coordinate with USGS personnel to place specific cabinets in specific relative positions based on labeling. Rock cabinet placement will occur before rock samples are unpacked and placed back in the cabinets.

Drawers may have to be removed if cabinets are too heavy or won't fit through doorways. In the new location, drawers will be replaced in their original positions.

Pre-palletized materials, including rock samples and set of documents, will be transported to the new location and placed in USGS-designated locations.

Helpful Information

- USGS will not supply a forklift, the vendor must bring their own. A forklift may not be used at the destination, 904 W. Riverside Ave. A forklift could be used at the load site only. Therefore, all work taking place at the destination will need to be completed using pallet jacks, carts, or other non-forklift methods.
- The narrowest door in the delivery path is about 33 3/8 inches wide. Archive and records boxes do not require tamper-evident security seals, basic taping is sufficient.
- Nine boxes of materials are already palletized on pallets measuring 40" W x 28" L. There are 2–3 smaller pallets, but none exceed these dimensions.
- Shelving and racking units do not need to be anchored to the floor at the destination.
- There will be a staging plan for the destinations. Some items will need to be placed in specific locations and positions, and they will be labeled on the staging plan. Other items (i.e. empty rock cabinets) will have less specific requirements but will also be on the staging plan.
- The USGS cannot estimate the weight of everything that needs to be moved or advise the contractor on how many vehicles are needed for the move.
- Please see the Liability Insurance clause for liability insurance requirements.
