Solicitation/Contract Form Continuation

Instrument Name: Roads & Grounds - Fort McCoy

Product Service Code : S216

Additional Q1: The solicitation states that all ODCs Equipment and Operating Materials are to be proposed in CLINs X001 and X002; however, the price schedule appears to only be intended to calculate labor costs and states that the formulas should not be changed. Will the government please advise as to how the ODCs, Equipment and Operating Material costs should be accounted for within the price schedule?

Additional A1: Labor costs will be included in the base period, option year 1, etc. tabs. For CLIN 0001, 1001, etc. add ODC costs to the labor costs to get your total unit price on the price schedule tab. For CLIN 0002, 1002, etc. there should be no labor costs to transfer from the base period, option year 1, etc tabs just a monthly unit price on the price schedule tab.

Q1: The Offeror respectfully requests a two-week extension of the proposal submission deadline. This request is due to:

1. The loss of available review time over the federal holiday season, and
2. The volume and technical complexity of the solicitation package, including multiple PWS sections, Service Attachments, GIS/map data, pricing schedules, staffing matrices, and CUI-controlled documents that must be reviewed in detail to ensure full compliance.

Please confirm whether the Government will grant a two-week extension to allow Offerors adequate time to prepare compliant and competitive proposals.

A1: The solicitation due date is extended to 28 January 2026.

Q2: In cases where requirements in the overarching Attachment 2 - Performance Work Statement (PWS) conflict with service-specific documents (e.g., SERVICE 404, 408, 420), please clarify which document governs for scope, performance standards, and pricing assumptions.

A2: The SERVICE documents provide more specific details than the PWS.

Q3: Is the Unpriced Staffing Matrix (Attachment 24) intended to represent minimum required staffing, or is it for evaluation purposes only? Additionally, may Offerors propose alternative staffing approaches provided all PWS performance requirements are met?

A3: Yes, the "Unpriced Staffing Matrix" is to provide reference that the offeror has accounted for enough "Man Hours", properly classified, to complete the contract requirements for evaluation. If there are alternative staffing approaches proposed, they should be described fully within the proposal submission for Factor 2, and/or again in Factor 3 (should it apply).

Q4: For CLIN 0007 (April Operations), where work may include either snow and ice removal OR grounds maintenance, should Offerors assume:

Worst-case (snow operations),

Average historical conditions, or

A blended pricing approach?

Please confirm intended risk allocation.

A4: The Offeror will be responsible to address an April snow event, should one occur. If conditions are favorable in April, the offeror should be working on addressing normal MAY-OCT requirements operations of road and lot repairs (patching, grading, etc.); turf repair and debris cleanup (trash, leaves, branches, snow plow damage repairs, etc.); and possibly even mowing and trimming efforts (if vegetation is grown past contract height requirements) during this month. From past years, the offeror will only be able to plow hard surfaced roads and lots, and some priority-only gravel surfaces due to frost coming out of the ground on the non-hard surfaced areas, resulting in a reduction of snow removal priorities for this month. In the past, and even with an April plowing event, there has been the requirement to mow on the last week of April.

Q5: Several tasks (e.g., tree removals, erosion repair, culvert work) appear both in routine CLINs and RFP/SO CLINs. Please clarify which conditions trigger a Service Order versus being included in routine monthly pricing.

A5: See Attachment 27 Extended CLIN Descriptions, to better describe the intent of the priced SO actions within the various CLINs.

Q6: In the event of discrepancies between Attachment 12 - GIS LM Acreage Data and the various Mowing Maps/Mapbooks, which dataset governs for pricing and performance?

A6: See Attachment 12 2025 GIS LM Acreage Data Updated. GIS acreage quantities were pulled from the same GIS data shapes used in creating the Maps. GIS data sheet will be the governing numbers for performance from the Army's GIS system of record.

Q7: Please confirm whether Priority 1A, 1, 2, 4, and 5 response times and clearance expectations are strictly governed by Annex A-10 (Snow and Ice Control Plan) or if additional DPW standards apply.

A7: Annex A-10 only applies to the airfield.

Q8: Does the 2025 Hazard Tree Survey (Attachment 23) represent pre-identified work included in the base Tree/Shrub Maintenance CLIN, or will these actions be issued as Service Orders?

A8: The Annual Tree Survey is a document submitted for approval and acceptance, where an arborist surveys a Government selected area, and documents all suggested work elements for safety issues and promoting the health of the trees. The Survey pricing will cover the labor and equipment needed to perform and document the SURVEY only. Addressing elements/issues found/described on the survey will be addressed by Service Order work separately.

Q9: Is the Equipment List (Attachment 25) a mandatory minimum, or may Offerors propose equivalent or alternative equipment configurations that meet performance standards?

A9: The Equipment list will be the minimum equipment the contractor will have at their disposal to perform the contract requirements for the duration of the contract. This list will be evaluated in your technical submission to provide confidence in capability to perform the work. Given the equipment list provided is a blank template, if there are alternative equipment configurations to consider, they must be described as to which equipment, and how they are replacing by efficiency or operating schedules to reduce a minimal equipment requirement for technical evaluation. The contractor will be held to their minimum equipment requirement as provided in their proposal if awarded the contract. Reductions in minimum equipment lists after award must be approved by the Government prior to removal from service.

Q10: Please confirm whether Offeror proposals must include a CUI marking plan and how CUI documents should be referenced or segregated within proposal volumes.

A10: The Proposals are documents of the Contractors for submittal, and therefore CUI labeling is not a requirement for the proposals. The government will classify any documents prior to award that are kept for record. CUI marking requirements after contract award for any submittal documents will be discussed with the awarded contractor.

Q11: Will the government grant a 2-week extension, to February 6, as the government and industry will essentially be shut down from now until January 5?

A11: The solicitation due date is extended to 28 January 2026.

Q12: What is the contract number for the incumbent contract? Who is the incumbent contractor?

Has the scope of work included the snow removal on the current contract awarded?

A12: This information is in the solicitation on pdf page 78. Overall, requirements are the same as current contract.

Q13: When is your site visit scheduled for this new work?

Q13: The site visit was conducted on 5 January 2026 and was located on page 77 of the solicitation.

Q14: I am currently working on a bid sheet for this contract, is there anything else you would need from us right away besides the bid sheet?

A14: All components of your proposal packet for technical evaluation as listed in the solicitation.

Q15: Can you tell me if these services are currently being performed by a contractor? If so, could you please provide the incumbent name as well as the contract number?

A15: This information is in the solicitation on pdf page 78.

Q16: What is the contract number for the incumbent contract? Who is the incumbent contractor?

A16: This information is in the solicitation on pdf page 78.

Q17: Has the scope of work included the snow removal on the current contract awarded?

A17: Yes

Q18: When is your site visit scheduled for this new work?

A18: The site visit was conducted on 5 January 2026 and was located on page 77 of the solicitation.

Q19: Is this contract currently governed by a collective bargaining agreement? If yes, will the government be issuing it as part of an amendment?

A19: Yes, the CBA has been added as Attachment 26.

Q20: Can the arborist get their OSHA 30 after contract award? Needing it prior to the proposal is a bit restrictive as most certified arborist don't carry OSHA 30.

A20: The Arborist's OSHA 30 training (or equivalent) has changed from a proposal submission document to a deliverable that is due prior to the end of the phase-in period.

Q21: The inclusion of the Commemorative Area within the turf maintenance requirement appears unclear. Should bidders include this requirement in their pricing starting in the base year and continuing through all four option periods?

A21: Yes, include in proposals as if you are maintaining from onset of Contract; however, it will not be required until COR directs you to perform the requirement due to the transfer of responsibility being unknown at this time.

Q22: Robotic Mowers Discussion: While innovation is vital, the site visit discussion on robotic mowers suggests a significant shift in requirements. Specifically:

a. We have researched other DoD sites using autonomous mowing, but having such vehicles operating on Post seems like a major security risk. Please confirm that Ft. McCoy does not consider these vehicles a threat, given potential misuse by malicious actors.

b. If autonomous mowing is permitted, will the government provide electrical service drops and the energy needed to charge these battery-powered vehicles?

A22a: Discussing with our Physical Security and Anti-terrorism teams, Fort McCoy is not poised to address any autonomous equipment that could potentially map, collect data, and/or photograph Fort McCoy areas and elements, as they fall under the Prohibited Activities in the Fort McCoy Regulation 420-29.

A22b: It will not be permitted for this Contract.

Q23: Snow Removal Capability Evaluation: Given the strict requirements for early-morning snow removal and the equipment this entails, how will the Government evaluate the proposed equipment and staffing? In other words, evaluators often accept a proposer's claims of capability rather than making a finding of unreasonableness due to subjectivity. How will this be addressed?

A23: Contractors should be providing their equipment production capabilities with their proposal for evaluation. The Contractor's performance assumptions should be presented in your proposal to ensure understanding for technical evaluation. It is the contractor's responsibility to ensure the information is provided in their proposal to allow it to be evaluated for technical acceptance.

Q24: Steep Bank Mowing CLIN: Will there be a separate CLIN for steep bank mowing along Fire Break Roads?

A24: Areas not accessible by Agricultural-type tractor will be addressed under the Heavy Fire Break Maintenance CLIN X011AB, by issue of a service order to complete the task as required.

Q25: Attachment 2 Paragraph 2.14 provides for a staging area as Government Furnished Property. Please clarify if the staging area improvements as defined in paragraph 7.1.1.68 such as fencing, utility systems, and other improvements are included as part of the Government Furnished Facilities.

A25: Paragraph 2.14 states that "The Contractor will be responsible for all maintenance of their provided areas (Mowing, grading, plowing, etc.). Areas designated as contractors space, will not be accounted for under contract quantities of contractor provided support. Routine maintenance of these facilities existing equipment will be performed by the Government. Such as: HVAC maintenance and repairs, plumbing issues, light bulb replacement, etc.

Q26: Attachment 2 Paragraph 2.14 provides for a staging area as Government Furnished Property. Please clarify that any utilities services provided at the staging area is the responsibility of the contractor.

A26: Contractor will be responsible for their internet services. There will be up to 4 (four) hard-wired phone lines provided to offices in the primary building; Electric, Gas, Water, and Sewer will be provided to the facilities as currently installed. Any additional requirements will be for the contractor to receive approval for installation, and at the contractor's cost.

Q27: Attachment 2, Paragraph 7.4.1 provides access to electrical services with written permission. Attachment 2, Paragraph 1.1.5 states electricity will be furnished by the Government to the contractor under this contract. The use of autonomous mowers require either hot swapping batteries or the use of charging stations. Charging stations are powered by 12VDC (8 amps) usually through a transformer (similar to a computer power supply) plugged into a standard 110V electric outlet. Charging stations would be remove when the mowing season ends. With charging stations, we will be able to mow sections up to 3 times a week with limited additional costs yet superior results. In coordination with the Government regarding placement, will the Government allow charging stations access to outside electrical outlets for areas that support Mowing Areas A, A1, and other areas that have a building with an outside electrical outlet within 3000 feet of the mowing area?

A27: Due to security concerns, autonomous mowers will not be allowed for this Contract.

Q28: Attachment 3 Paragraph 2.2.1 requires the bagging of grass trimming. Under traditional gas powered mowing equipment, this requirement is reasonable. However, with autonomous robotic mowers that mow areas multiple times a week with minimal intervention, there is

nothing to rake or bag. Without removing the requirement, would the Government consider a waiver of this requirement if the grass trimmings are less than 1/4 inch?

A28: Autonomous mowers will not be allowed for this contract.

Q29: Attachment 2, Paragraph 7.5.2.2 requires the contractor to remove all vehicles, trailers, and equipment from the installation at the end of each workday, unless otherwise directed by the KO. For optimal performance and minimal disruption to facility operations, our proven solution in other facilities is to operate autonomous mowers that operate silently 24 hours a day. Will the Government consider allowing equipment to remain on site at the end of the day if the equipment is operating silently and does not interfere with other installation activities?

A29: Autonomous mowers will not be allowed for this contract. Contractor's equipment is to be returned to their staging areas (Government Furnished Facilities - Contractor's Facilities), each day, unless otherwise directed by the KO/COR.

Q30: The PWS is silent on restrictions regarding radio frequencies. We intend to communicate with our autonomous equipment utilizing GPS coordinates and commercial cellular frequencies. The systems do not connect with Government networks with the exception of receiving coordinates from the Government owned GPS satellite network. With coordination and registration with the Government of all transmitting equipment, will the Government allow the limited use of GPS and commercial cellular radio communications on the facilities?

A30: Autonomous Equipment will not be allowed on this contract.

Q31: Some of the autonomous robotic manufacturers utilize cameras for guidance systems. Functionality is limited if the cameras are disabled, but the autonomous mowers are still operational. We assume, camera enabled autonomous robots will not be authorized in sensitive areas. Working with the Government, will camera-enabled autonomous robots be authorized in specified locations?

A31: Autonomous Equipment will not be allowed on this contract.

Q32: The PWS does not discuss placement of ground guidance wires. Autonomous mowers that are operated with guidance wires are significantly less expensive than autonomous mowers that must rely solely on GPS coordinates. Guide wires require a charging station and a single strand 12 DCV wire buried between one to six inches. With coordination with the Government, will the contractor be able to use wire guided autonomous systems in select locations?

A32: Autonomous Equipment will not be allowed on this contract.

Q33: The price schedule requests unit prices for additional grass cutting by commercial riding mower and by agricultural class mower. We intend to mow 80% to 90% of all mowing locations with autonomous robots, to include areas traditionally serviced by zero turns and tractors with mowing attachments. The remaining 10% to 20% that are currently more efficiently utilizing traditional gas powered equipment because either the area is too narrow (less than 3 to 5 feet), too steep (greater than 44 degrees) or the grass is too high (14 inches). For the SLINs of additional grass cutting, does the Government require the use of a commercial riding mower or an agricultural class mower?

A33: Autonomous Equipment will not be allowed on this contract. Both, this is why there are two separate line items to price.

Q34: The price schedule requests unit prices for additional grass cutting by commercial riding mower and by agricultural class mower. We intend to mow 80% to 90% of all mowing locations with autonomous robots, to include areas traditionally serviced by zero turns and tractors with mowing attachments. As such, when we do utilize robots, the incremental cost is negligible. Are the quantities (50 acres per year and 200 acres per year) in the price matrix ceiling quantities?

A34: Autonomous Equipment will not be allowed on this contract. The quantities used are ceiling prices for that CLIN.

Q35: Factor 2 of the Technical evaluates staffing adequacy. Factor 3 of the Technical evaluates equipment adequacy. In our experience, the use of autonomous robots reduces the labor requirements by a factor of 5 to 1. The use of autonomous robots eliminates all zero turns and all but one tractor (plus one push mower for narrow sections). If the previous work was performed by zero turns, 1 employee with autonomous mowers can do the same output of more the 5 employees on zero turns. Over the past 5 years, whenever these staffing reductions were presented as a response to a Federal Government solicitation, the reductions were scored as unrealistic when compared to the Government Estimate. Thus, autonomous mowing solutions have not penetrated the federal marketplace except for several VA cemeteries where technical evaluations were not performed. However, that was prior to the commercial marketplace providing results in a variety of environments. We have specific examples of current labor and equipment requirements covering the entire range of appearances, from manicured golf courses to semi-annual vegetation control under power transmission lines. Many of these examples have more than five years experience in operating autonomous robots. Will the evaluators consider current examples in the commercial marketplace that are of similar size and scope when comparing the staffing and equipment need using an autonomous mowing solution and not compare the proposed solution to the Independent Government Estimate if the Independent Government Estimate did not consider the disruptive nature of the latest technology?

A35: Autonomous Equipment will not be allowed on this contract.

Q36: Attachment 8 requires a Cost Build Up for each CLIN. The build-up does not include any ODCs per FFP CLIN. When using autonomous robots, the subscription service and cost of the equipment is comparable to the total cost of labor. The spreadsheet allows only 1 column (overhead) for all these costs to be spread across all CLINs. While we recognize the Government spreadsheet identifies all labor costs in accordance with FAR 52.222.43, may the offeror adjust the spreadsheet to reflect the elements of cost of the solution?

A36: Autonomous Equipment will not be allowed on this contract. Proposals shall be priced within the CLIN structure as found on the Price Schedule and the spreadsheet should not be adjusted.

Q37: The price matrix include cost reimbursable materials. The CLIN (X017) does not specify what is included or excluded in as cost reimbursable materials. Specifically, is fuel for contractor equipment cost reimbursable? If fuel is cost reimbursable, will the Government adjust the estimated cost if the proposed solution limits the use of gas powered equipment? Does the CR materials include replacement parts such as mower blades? Or does the CR

materials only include materials specifically used in the service (i.e. road salt) and excludes materials used by the contractor but not directly delivered to the Government (i.e. uniforms, fuel, parts, and other ODCs)?

A37: Fuel Cost is not reimbursable. Contractor is to provide fuels costs in their proposal under CLIN X002. CLIN X017 applies to government needed elements such as Urea for Airfield De-icing, purchase of Landscaping Stone, mulch, erosion mat and staples, culverts, seed, guardrail components, hog panels, breaker/Riprap, and other materials needed to perform any maintenance work on RFP CLIN X016. All costs to operate Contractor's shop and equipment should be covered under CLINs X001 or X002.

Q38: If the offeror uses a subscription service that provides software, hardware, maintenance warranty, and all replacement parts, is the subscription service allowed as a Cost Reimbursable material expense under (CLIN X017)?

A38: No. Any subscriptions to perform contract requirements should be covered under CLINs X001 or X002.

Q39: Could the government provide further information on Government Furnished equipment, materials, and supplies?

A39: We provide the facilities (and their utilities) and maintenance project materials such as: gravel, salt, road patch, culverts, seed and mulch. Any other supplies, such as office, fuels, oils /lubricants, tires, mower blades, filters, etc should be accounted for under CLINs X001 and X002.

Q40: Would the incumbent's contractor furnished equipment that has been used and fully billed to their contract be available for use?

A40: No. It is the Contractor's equipment, not the Governments.

Q41: Would the government extend the proposal due date 2 weeks?

A41: The solicitation due date is extended to 28 January 2026.

Q42: Street sweeping debris dump on-site?

A42: Yes, there is a dump site on Cantonment for this requirement.

Q43: Will autonomous equipment be awarded for this contract?

A43: Autonomous Equipment will not be allowed on this contract.

Q45: Is the gov't planning to publish a list of the attendees of the site visit and, will the gov't be posting the Q&As once completed. Understand they were due today so not asking to rush answers?

A45: Yes

Q46: I know many had the question of why the Arborist needed the OSHA 30 certification as that certification was never needed on the contract and seemed restrictive to bidders.

A46: The Arborist's OSHA 30 training (or equivalent) has changed from a proposal submission document to a deliverable that is due prior to the end of the phase-in period.

LIMITATIONS ON SUBCONTRACTING (FEB 2023) (DEVIATION 2021-O0008)

(a) This clause does not apply to the unrestricted portion of a partial set-aside.

(b) *Definition. Similarly situated entity*, as used in this clause, means a first-tier subcontractor, including an independent contractor, that--

(1) Has the same small business program status as that which qualified the prime contractor for the award (e.g., for a small business set-aside contract, any small business concern, without regard to its socioeconomic status); and

(2) Is considered small for the size standard under the North American Industry Classification System (NAICS) code the prime contractor assigned to the subcontract.

(c) *Applicability*. This clause applies only to--

(1) Contracts that have been set aside for any of the small business concerns identified in 19.000(a)(3);

(2) Part or parts of a multiple-award contract that have been set aside for any of the small business concerns identified in 19.000(a)(3);

(3) Contracts that have been awarded on a sole-source basis in accordance with subparts 19.8, 19.13, 19.14, and 19.15;

(4) Orders expected to exceed the simplified acquisition threshold and that are--

(i) Set aside for small business concerns under multiple-award contracts, as described in 8.405-5 and 16.505(b)(2)(i)(F); or

(ii) Issued directly to small business concerns under multiple-award contracts as described in 19.504(c)(1)(ii);

(5) Orders, regardless of dollar value, that are--

(i) Set aside in accordance with subparts 19.8, 19.13, 19.14, or 19.15 under multiple-award contracts, as described in 8.405-5 and 16.505(b)(2)(i)(F); or

(ii) Issued directly to concerns that qualify for the programs described in subparts 19.8, 19.13, 19.14, or 19.15 under multiple-award contracts, as described in 19.504(c)(1)(ii); and

(6) Contracts using the HUBZone price evaluation preference to award to a HUBZone small business concern unless the concern waived the evaluation preference.

(d) *Independent contractors.* An independent contractor shall be considered a subcontractor.

(e) *Limitations on subcontracting.* By submission of an offer and execution of a contract, the Contractor agrees that in performance of a contract assigned a North American Industry Classification System (NAICS) code for--

(1) Services (except construction), it will not pay more than 50 percent of the amount paid by the Government for contract performance, excluding certain other direct costs and certain work performed outside the United States (see paragraph (e)(1)(i)), to subcontractors that are not similarly situated entities. Any work that a similarly situated entity further subcontracts will count towards the prime contractor's 50 percent subcontract amount that cannot be exceeded. When a contract includes both services and supplies, the 50 percent limitation shall apply only to the service portion of the contract. The following services may be excluded from the 50 percent limitation:

(i) Other direct costs, to the extent they are not the principal purpose of the acquisition and small business concerns do not provide the service. Examples include airline travel, work performed by a transportation or disposal entity under a contract assigned the environmental remediation NAICS code 562910), cloud computing services, or mass media purchases.

(ii) Work performed outside the United States on awards made pursuant to the Foreign Assistance Act of 1961, or work performed outside the United States required to be performed by a local contractor.

(2) Supplies (other than procurement from a nonmanufacturer of such supplies), it will not pay more than 50 percent of the amount paid by the Government for contract performance, excluding the cost of materials, to subcontractors that are not similarly situated entities. Any work that a similarly situated entity further subcontracts will count towards the prime contractor's 50 percent subcontract amount that cannot be exceeded. When a contract includes both supplies and services, the 50 percent limitation shall apply only to the supply portion of the contract;

(3) General construction, it will not pay more than 85 percent of the amount paid by the Government for contract performance, excluding the cost of materials, to subcontractors that are not similarly situated entities. Any work that a similarly situated entity further subcontracts will count towards the prime contractor's 85 percent subcontract amount that cannot be exceeded; or

(4) Construction by special trade contractors, it will not pay more than 75 percent of the amount paid by the Government for contract performance, excluding the cost of materials, to subcontractors that are not similarly situated entities. Any work that a similarly situated entity further subcontracts will count towards the prime contractor's 75 percent subcontract amount that cannot be exceeded.

(f) The Contractor shall comply with the limitations on subcontracting as follows:

(1) For contracts, in accordance with paragraphs (c)(1), (2), (3) and (6) of this clause--

XX By the end of the base term of the contract and then by the end of each subsequent option period; or

By the end of the performance period for each order issued under the contract.

(2) For orders, in accordance with paragraphs (c)(4) and (5) of this clause, by the end of the performance period for the order.

(g) A joint venture agrees that, in the performance of the contract, the applicable percentage specified in paragraph (e) of this clause will be performed by the aggregate of the joint venture participants.

(1) In a joint venture comprised of a small business protege and its mentor approved by the Small Business Administration, the small business protege shall perform at least 40 percent of the work performed by the joint venture. Work performed by the small business protege in the joint venture must be more than administrative functions.

(2) In an 8(a) joint venture, the 8(a) participant(s) shall perform at least 40 percent of the work performed by the joint venture. Work performed by the 8(a) participants in the joint venture must be more than administrative functions.

8. Contract performance:

Purpose. IAW with FAR Subpart 42.1500 contractor past performance information (PPI) is relevant information for future source selection purposes regarding a contractor's actions under previously awarded contracts. It includes, for example, the contractor's record of conforming to contract requirements and to standards of good workmanship; the contractor's record of forecasting and controlling costs; the contractor's adherence to contract schedules, including the administrative aspects of performance; the contractor's history of reasonable and cooperative behavior and commitment to customer satisfaction; and generally, the contractor's business-like concern for the interest of the customer. Contractor past performance information is one of the tools that support Army efforts to acquire best value and is used to evaluate performance risk in source selection. The feedback provided by the government to the contractor in collecting PPI, and the knowledge that PPI will be used in future source selection decisions, should result in improved performance and a greater contractor focus on customer satisfaction.

Contractor Performance Assessment Reports System (CPARS): CPARS shall be prepared IAW AFARS Subpart 42 upon physical completion of the contract. If the period of performance will exceed 18 months, an "interim" assessment report shall be prepared at the completion of 12 months performance and annually thereafter until the contract is physically complete. An out-

of-cycle or "addendum" report may be prepared if there is a need to record an extraordinary event prior to the next regularly scheduled evaluation or if it is necessary to report a meaningful occurrence during the period between physical completion of the contract and contract closeout. Additionally, addendum reports may be prepared to record contractor's performance relative to contract closeout and other administrative requirements (e.g. final indirect cost proposals, technical data, etc.).

Completion Due Date. The government will complete the CPARS within 60 days after the end of the assessment rating period (if applicable).

Evaluators. The Contracting Officer and the Contracting Officer's Representative will jointly complete the performance assessment.

Contracts Performance Elements. The contractor's performance shall be assessed in accordance with elements and rating system set forth in AFARS Subpart 42.

Contractor Review. The Contracting Officer will furnish a copy of the CPARS to the contractor requesting that the contractor submit comments, rebutting statements, and/or additional information to the Contracting Officer within 30 calendar days of receipt. Failure to respond within the designated timeframe will be taken as agreement with the assessment.

Contract Concurrence. Where a contractor concurs with, or takes no exception to a CPARS, such report shall be considered final and releasable for use in source selection and other deliberative purposes.

Contractor Rebuttal. Where a contractor takes exception to a performance report, the Contracting Officer will review the contractor's rebuttal or comments and make appropriate changes. If the Contracting Officer makes changes, the changed rating will be reflected in the narrative. The Contracting Officer will make all reasonable efforts to reconcile the report and the contractor's comments. However, it is not necessary that they reach agreement on the report where such is clearly impracticable. The contractor's rebuttal or comments shall be made part of the CPARS.

Resolving Disagreements between the Government and the Contractor. In the event disagreements between the parties regarding the CPARS occur, the Contracting Officer will review the rebuttal and make appropriate changes. If no agreement is reached, the CPARS is forwarded to the Reviewing Official (Director of Contracting) along with the Contracting Officer's Findings and Recommendation and supporting documentation. The decision of the Reviewing Official is final. Copies of the CPARS and the contractor's response and review comments, if any, shall be retained as part of the evaluation.

Release of Contractor Performance Evaluation Information. The evaluation will not be released to other than government personnel and the contractor whose performance is evaluated. The performance evaluation information will be input into the applicable module within Contractor Performance Assessment Reporting System (CPARS) database (or Government system in use at time of the evaluation).

Source Selection Information. Departments and agencies will electronically access the CPARS information to support future award decisions.

9. Legal compliance: The Contractor shall comply with all Federal, State, and Local Laws, codes and regulations applicable to his performance under this contract and shall be solely responsible for all costs associated with said compliance.

252.232-7007 Limitation of Government's 2014-04
Obligation.

LIMITATION OF GOVERNMENT'S OBLIGATION (APR 2014)

(a) Contract line item(s) 0001 through 4017 are incrementally funded. For this/these item(s), the sum of \$0.00 of the total price is presently available for payment and allotted to this contract. An allotment schedule is set forth in paragraph (j) of this clause.

(b) For item(s) identified in paragraph (a) of this clause, the Contractor agrees to perform up to the point at which the total amount payable by the Government, including reimbursement in the event of termination of those item(s) for the Government's convenience, approximates the total amount currently allotted to the contract. The Contractor is not authorized to continue work on those item(s) beyond that point. The Government will not be obligated in any event to reimburse the Contractor in excess of the amount allotted to the contract for those item(s) regardless of anything to the contrary in the clause entitled "Termination for Convenience of the Government." As used in this clause, the total amount payable by the Government in the event of termination of applicable contract line item(s) for convenience includes costs, profit, and estimated termination settlement costs for those item(s).

(c) Notwithstanding the dates specified in the allotment schedule in paragraph (j) of this clause, the Contractor will notify the Contracting Officer in writing at least ninety days prior to the date when, in the Contractor's best judgment, the work will reach the point at which the total amount payable by the Government, including any cost for termination for convenience, will approximate 85 percent of the total amount then allotted to the contract for performance of the applicable item(s). The notification will state (1) the estimated date when that point will be reached and (2) an estimate of additional funding, if any, needed to continue performance of applicable line items up to the next scheduled date for allotment of funds identified in paragraph (j) of this clause, or to a mutually agreed upon substitute date. The notification will also advise the Contracting Officer of the estimated amount of additional funds that will be required for the timely performance of the item(s) funded pursuant to this clause, for a subsequent period as may be specified in the allotment schedule in paragraph (j) of this clause or otherwise agreed to by the parties. If after such notification additional funds are not allotted by the date identified in the Contractor's notification, or by an agreed substitute date, the Contracting Officer will terminate any item(s) for which additional funds have not been allotted, pursuant to the clause of this contract entitled "Termination for Convenience of the Government."

(d) When additional funds are allotted for continued performance of the contract line item(s) identified in paragraph (a) of this clause, the parties will agree as to the period of contract performance which will be covered by the funds. The provisions of paragraphs (b) through (d) of this clause will apply in like manner to the additional allotted funds and agreed substitute date, and the contract will be modified accordingly.

(e) If, solely by reason of failure of the Government to allot additional funds, by the dates indicated below, in amounts sufficient for timely performance of the contract line item(s) identified in paragraph (a) of this clause, the Contractor incurs additional costs or is delayed in the performance of the work under this contract and if additional funds are allotted, an equitable adjustment will be made in the price or prices (including appropriate target, billing, and ceiling prices where applicable) of the item(s), or in the time of delivery, or both. Failure to agree to any such equitable adjustment hereunder will be a dispute concerning a question of fact within the meaning of the clause entitled "Disputes."

(f) The Government may at any time prior to termination allot additional funds for the performance of the contract line item(s) identified in paragraph (a) of this clause.

(g) The termination provisions of this clause do not limit the rights of the Government under the clause entitled "Default." The provisions of this clause are limited to the work and allotment of funds for the contract line item(s) set forth in paragraph (a) of this clause. This clause no longer applies once the contract is fully funded except with regard to the rights or obligations of the parties concerning equitable adjustments negotiated under paragraphs (d) and (e) of this clause.

(h) Nothing in this clause affects the right of the Government to terminate this contract pursuant to the clause of this contract entitled "Termination for Convenience of the Government."

(i) Nothing in this clause shall be construed as authorization of voluntary services whose acceptance is otherwise prohibited under 31 U.S.C. 1342.

(j) The parties contemplate that the Government will allot funds to this contract in accordance with the following schedule:

- On execution of contract and upon formal contract modifications.

(h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals-

(1) ☐ Are, ☐ are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2) ☐ Have, ☐ have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3) ☐ Are, ☐ are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h) (2) of this clause; and

(4) ☐ Have, ☐ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 9.104-5(a)(2) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

Addendum to Evaluation - Commercial Product and Commercial Services

SECTION M - EVALUATION FACTORS FOR AWARD (ADDENDUM TO FAR 52.212-2 EVALUATION OF COMMERCIAL ITEMS)

M-1. Basis for Contract Award

M-1.1. This section outlines the criteria the Government will use in evaluating the offeror's capabilities and proposals for the Roads and Grounds Maintenance Services located at Fort McCoy, WI.

M-1.2. A Technical Evaluation will be conducted in accordance with the Federal Acquisition Regulation (FAR), as supplemented by the Defense Federal Acquisition Regulation Supplement (DFARS), and the Army Federal Acquisition Regulation Supplement (AFARS). Award will be made to a single offeror who is deemed responsible in accordance with the Federal Acquisition Regulation (FAR), whose proposal conforms to the solicitation requirements, and whose proposal, judged by an overall assessment of the evaluation criteria and other considerations specified in this solicitation, represents a Technically Acceptable offer.

M-1.3. Award will be based on the lowest evaluated price of proposals received that meet, or exceed, the acceptable standards of the non-price factors identified in the solicitation IAW FAR 15.101-2(b)(3). All proposals received will be evaluated for technical acceptability. Trade-offs between cost/price and non-cost/price factors are not permitted. Unbalanced, inaccurate or incomplete price proposals, may be the grounds for entering discussions. The Government will evaluate proposed prices for reasonableness using price analysis techniques, in accordance with FAR 15.404-1(b). Pricing will also be evaluated for fair and reasonableness and for fair market price. Proposed prices evaluated as unreasonable may be grounds for eliminating a proposal from competition.

M-1.4. Award for All of the Work. The Government intends to award one contract as a result of this solicitation. Offers received for less than the stated number of items listed in the Price Schedule and incomplete offers will be considered ineligible for award. As set forth in FAR 52.212-1, the Government intends to evaluate proposals and award a contract without discussions with offerors (except clarifications as described in FAR 15.306(a), Clarifications and award without discussions). Therefore, the offeror's initial proposal should contain the offeror's best terms from a cost or price and technical standpoint. The Government reserves the right to conduct discussions if the Contracting Officer later determines them to be necessary.

M-2. Evaluation Criteria

Evaluation criteria consists of four parts with factors. The proposals will be evaluated under the following evaluation parts:

Factor 1: RFP Documents

Factor 2: Technical

Factor 3: Past Performance

Factor 4: Price

M-2.1. Part 1: RFP Documents

Offeror must be found acceptable on all bullets in order to be found acceptable for the part. The part will receive one of the adjectival ratings defined below.

- Completed SF1449
- Acknowledgement of any amendments (SF30) (if applicable)
- Teaming agreements/joint ventures
- Representations & Certifications

Acceptable	All required documents for Part 1 are signed (if applicable) and received
Unacceptable	All required documents for Part 1 are not signed (if applicable) and/or received

M-2.2. Part 2: Technical

The Technical Factor evaluation provides an assessment of the offeror's capability to satisfy the Government's minimum requirements. The Technical Evaluation will be conducted using a the following ratings (Acceptable or Unacceptable) to evaluate the Technical factor (to include subfactors); keeping in mind that mere promises to comply with contractual requirements are an insufficient basis for an Acceptable rating; evidence is required in support of any statements relating to promised performance. Each subfactor will be assigned a rating of Acceptable or Unacceptable. The compilation of the subfactors, of Acceptable or Unacceptable, will form the overall factor rating. The proposal will be evaluated in accordance with the information set forth in the RFP. Based on the information provided pursuant to the instructions for content proposal, the Government will evaluate the Technical Proposal and assign a rating of Acceptable or Unacceptable. Offeror must be found acceptable on all bullets in order to be found acceptable for the factor. The Technical Factors will receive one of the adjectival ratings defined below.

Rating	Description
Acceptable	Proposal clearly meets the minimum requirements of the solicitation.
Unacceptable	Proposal does not clearly meet the minimum requirements of the solicitation.

Factor 1: Technical - Key Personnel

- In order to be considered acceptable, the offeror must demonstrate that each designated key personnel meets the solicitation requirements.

- Alternate Project Manager: Relevant qualifications and a minimum 5 years' experience in base support management, with direct roads and grounds maintenance servicing a municipality or installation of similar size, or a contract similar in scope and breadth to this solicitation.
 - Ability to supervise, resolve conflict, and communicate effectively.
 - Ability to understand, speak, read, and write the English language.
- Quality Control Manager (QCM): Relevant qualifications and a minimum of 3 years' experience in quality control inspection on service or construction projects.

Factor 2: Technical - Organizational Chart/Unpriced Staffing Matrix

In order to be considered acceptable, the offeror will be evaluated on the following:

Organization Chart:

- A clear organizational chart with roles identified, including key personnel and subcontractors mostly integrated. Staffing appears adequate to cover seasonal demands (snow removal, mowing, repairs)

- **Management Approach:** Evaluators look at whether the chart shows clear lines of authority for crews handling road repair, snow removal, landscaping, and grounds upkeep.
- **Key Personnel:** The chart must identify critical roles such as Project Manager, Roads Supervisor, Grounds Supervisor, Safety Officer, and Quality Control Manager.
- **Staffing Adequacy:** The chart demonstrates whether enough crews and equipment operators are assigned to meet seasonal demands (e.g., snow removal in winter, mowing in summer).
- **Integration of Subcontractors:** If subcontractors are used for specialized tasks (like asphalt paving or tree removal), the chart must show how they fit into the prime contractor's structure.
- **Communication Flow:** Evaluators check that reporting lines ensure quick response to emergencies (e.g., storm damage, icy roads).

Unpriced Staffing Matrix:

- **Complete in its entirety** the provided attachment "Unpriced Staffing Matrix" showing whether enough crews and equipment operators are assigned to meet seasonal demands (e.g., snow removal in winter, mowing and road maintenance operators in summer)
- **Completeness:** The matrix must be fully filled out using the provided template. Missing positions, incomplete data, or blank fields can render it Unacceptable.
- **Adequacy of Staffing Levels:** Must show sufficient crews/operators for seasonal peaks: (Winter: snow removal crews, plow operators, salt spreaders. Summer: mowing crews, arborists, road repair teams). Staffing must align with the installation's acreage and workload.
- **Integration with Organizational Chart:** Personnel listed in the matrix should match the roles in the organizational chart. Subcontractors must be clearly identified and integrated.
- **Realism & Feasibility:** Staffing levels must be realistic for the scope of work and can sustain operations without gaps.

Factor 3: Technical - Equipment List:

In order to be considered acceptable, the offeror will be evaluated on the following:

- **Complete in its entirety** the provided attachment "Equipment List" showing the equipment is realistic for the scope of work outlined in the PWS. Includes all major categories (snow removal, road repair, grounds upkeep, support). Quantities are sufficient for the size and operational demands of the installation.
- **Completeness:** The list must be fully filled out using the provided attachment. Missing categories or incomplete entries can result in an Unacceptable rating.
- **Coverage of Major Categories:** Must include equipment for all core service areas: Snow removal (plows, salt spreaders, loaders, dump trucks); Road repair (graders, rollers,

asphalt equipment); Grounds upkeep (mowers, trimmers, arborist gear); Support equipment (trailers, utility vehicles, safety gear)

- **Adequacy of Quantities:** Quantities must be sufficient for the size and operational demands of the installation.
- **Realism & Feasibility:** Equipment must be appropriate for the scope of work and can realistically sustain operations across seasons. Outdated, undersized, or impractical equipment may trigger an Unacceptable rating.
- **Integration with Staffing & Org Chart:** Equipment quantities should align with the staffing matrix (e.g., enough operators for listed machines).

M-2.3. Factor 3: Past Performance.

The Past Performance evaluation will assess the offeror's probability of meeting the solicitation's requirements as indicated by that offeror's record of past performance. Past Performance is assessed at the factor level after evaluating aspects of the offeror's recent past performance and focusing on performance that is relevant to the services being procured under this solicitation. The Past Performance evaluation will assess offeror's relevant and recent past performance record to determine the offeror's ability to perform as proposed. Potential sources of data are sources such as the Contractor Performance Assessment Reporting System (CPARS), Federal Award Performance and Integrity Information System (FAPIIS), contracting officer's knowledge of previous experience with the service being acquired, and any other reasonable sources. In assessing past performance, the Government will assess the offeror's overall past performance, and will examine how well the offeror performed in the following areas:

- Business Relations
- Quality of Service
- Schedule
- Cost Control
- Customer Satisfaction
- Management of Key Personnel
- Similar performance experience in providing roads and grounds type services for large acreage areas

The Past Performance Factor will be assigned one of the assessment ratings as defined in the following chart:

Rating	Description

Acceptable	Based on the offeror's performance record, the Government has a reasonable expectation that the offeror will successfully perform the required effort, or the offeror's performance record is unknown.
Unacceptable	Based on the offeror's performance record, the Government has no reasonable expectation that the offeror will be able to successfully perform the required effort.

Recency Assessment. An assessment of the past performance information will be made to determine if it is recent. To be recent, the effort must be ongoing or must have been performed during the past three (3) years from the date of issuance of this solicitation. Past performance information that fails this condition will not be evaluated.

Relevancy Assessment. To be relevant, the effort must be similar in nature of work, size, and complexity. The Government will conduct an in-depth evaluation of all recent performance information obtained to determine if it is the same or similar in nature of work, size, and complexity to the services/products being procured under this solicitation.

A relevancy determination of the offeror's (including joint venture partner(s) and major and critical subcontractor(s)) past performance will be made. In determining relevancy for individual contracts, consideration will be given to the effort, or portion of the effort, being proposed by the offeror, teaming partner, or subcontractor whose contract is being reviewed and evaluated. In establishing what is relevant for the acquisition, consideration will be given to an offeror's contract history which gives the most confidence that the offeror will satisfy the current procurement. The past performance information provided in the proposal and obtained from other sources will be used to establish the relevancy of past performance.

Offerors without a record of relevant past performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the offeror may not be evaluated favorably or unfavorably on past performance. Therefore, the offeror shall be determined to have unknown past performance. In the context of acceptability/unacceptability, "unknown" shall be considered "acceptable."

M-2.4. Factor 3: Price.

Price will not be scored or rated. Evaluation of price will be performed using one or more of the price analysis techniques in FAR 15.404-1(b). Through these techniques the Government will determine whether prices are fair and reasonable, a fair market price, complete and balanced.

The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. Evaluation of options shall not obligate the Government to exercise the option(s). As part of price evaluation, the government will evaluate its option to extend services (see FAR Clause 52.217-8) by adding one-half of the offeror's final option period price to the offeror's total price. Thus, the offeror's total price for the purpose of evaluation will include the phase-in, base period, 1st option, 2nd option, 3rd option,

4th option, 1/2 of the 4th option. Offerors shall not submit a price for the potential six month extension of services period. The Government may choose to exercise the Extension of Services at the end of any performance period (base or option periods), utilizing the rates of that performance period.

Unbalanced Pricing: Offerors are cautioned against submitting a proposal that contains unbalanced pricing. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract line items is significantly over or understated as indicated by the application of price analysis techniques. Unbalanced Pricing will be evaluated in accordance with FAR 15.404-1(g), as applicable, to assess potential performance risk which could result in unreasonably high prices. The Government shall analyze offers to determine whether they are unbalanced with respect to separately priced line items or subline items. Discussions may commence if proposals is determined to be unbalanced.

Definitions.

- Reasonableness. A price is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person in the conduct of competitive business.
- Completeness/Accuracy. The offeror's proposal is in compliance with the pricing instructions in the solicitation.

In conducting the Past Performance evaluation, the Government reserves the right to use both the information provided in the offeror's Past Performance Volume and information obtained from other sources, such as the Contractor Performance Assessment Reporting System (CPARS) or similar systems, Defense Contract Management Agency (DCMA) and commercial sources. Offerors are reminded that both independent data and data provided by offerors in their proposals may be used by the Government to evaluate offeror past performance. However, the burden of providing thorough, complete, and current past performance information as requested in this paragraph remains with the offerors. Proposals that do not contain the information requested by this paragraph risk rejection or a less than acceptable performance rating by the Government. All past performance comments received will be taken into account and could affect the overall rating. The overall past performance evaluation is a subjective decision based on the whole of all data received. In the case of an offeror without a record of relevant past performance or for whom information on past performance is not available or so sparse that no meaningful past performance rating can be reasonably assigned, the offeror may not be evaluated favorably or unfavorably on past performance (see FAR 15.305 (a)(2) (iv)). The past performance information provided will be evaluated to determine the extent of:
