Block 14. DESCRIPTION OF AMENDMENT (cont.)

A. This amendment provides responses to pre-proposal inquiries:

1. We would like to know the type of the existing interstitial leak sensor?

Response:

Reference Specification Section 33 57 55 Paragraph 2.5 Leak Sensor. Submit proposals in accordance with RFP, Specifications, Drawings and all amendments.

2. Drawing M-101 indicates for the contractor to remove and replace Tank 1 which has a stated fuel capacity of 10,000 Gallons. However, Spec Section 33 57 55 (FUEL SYSTEM COMPONENTS (NON-HYDRANT)) only indicates the acceptable materials for the new tank and the type of fuel that the new tank can hold. Can Spec Section 33 57 55 be revised by Amendment indicating the additional salient characteristics of the new tank required for the project?

Response:

No tanks are being replaced. The scope of work is to replace tank and pipe coatings for all 3 tanks. Reference Specification Section 01 11 00 Paragraph 1.1.1. Submit proposals in accordance with RFP, Specifications, Drawings and all amendments.

3. After visiting the project site and reviewing the project drawings with the on-site MCCS General Manager, the Building Tenants are under the impression that all (3) Fuel Tanks are to be replaced as part of this project. However, the project drawing details require the contractor to replace Tank 001 only. Will Tanks 2 & 3 be added to the project by Amendment, Post-Award Modification or be completed as part of a future MACC RFP(s)?

Response:

No tanks are being replaced. The scope of work is to replace tank and pipe coatings for all 3 tanks. Reference Specification Section 01 11 00 Paragraph 1.1.1. Submit proposals in accordance with RFP, Specifications, Drawings and all amendments.

4. Our fuels subcontractor has informed us that the current minimum lead time for fuel tanks of this capacity is 180 Days after submittal approval. Can 180 Days be added to the project to allow for fabrication and delivery of the new tank to MCAS Cherry Point?

Response:

No tanks are being replaced. The scope of work is to replace tank and pipe coatings for all 3 tanks. Reference Specification Section 01 11 00 Paragraph 1.1.1. No additional time will be added to the contract. Submit proposals in accordance with RFP, Specifications, Drawings and all amendments.

5. Drawing M-101 indicates for the contractor to repair (1) Fence Post on the west side of the existing fence that encloses the existing fuel tanks. However, after visiting the project site, all of the existing fence posts on the west side of the fence are damaged and will require repair. Can it be confirmed by Amendment that all of the existing fence posts on the west side of the fence are to be repaired by the contractor?

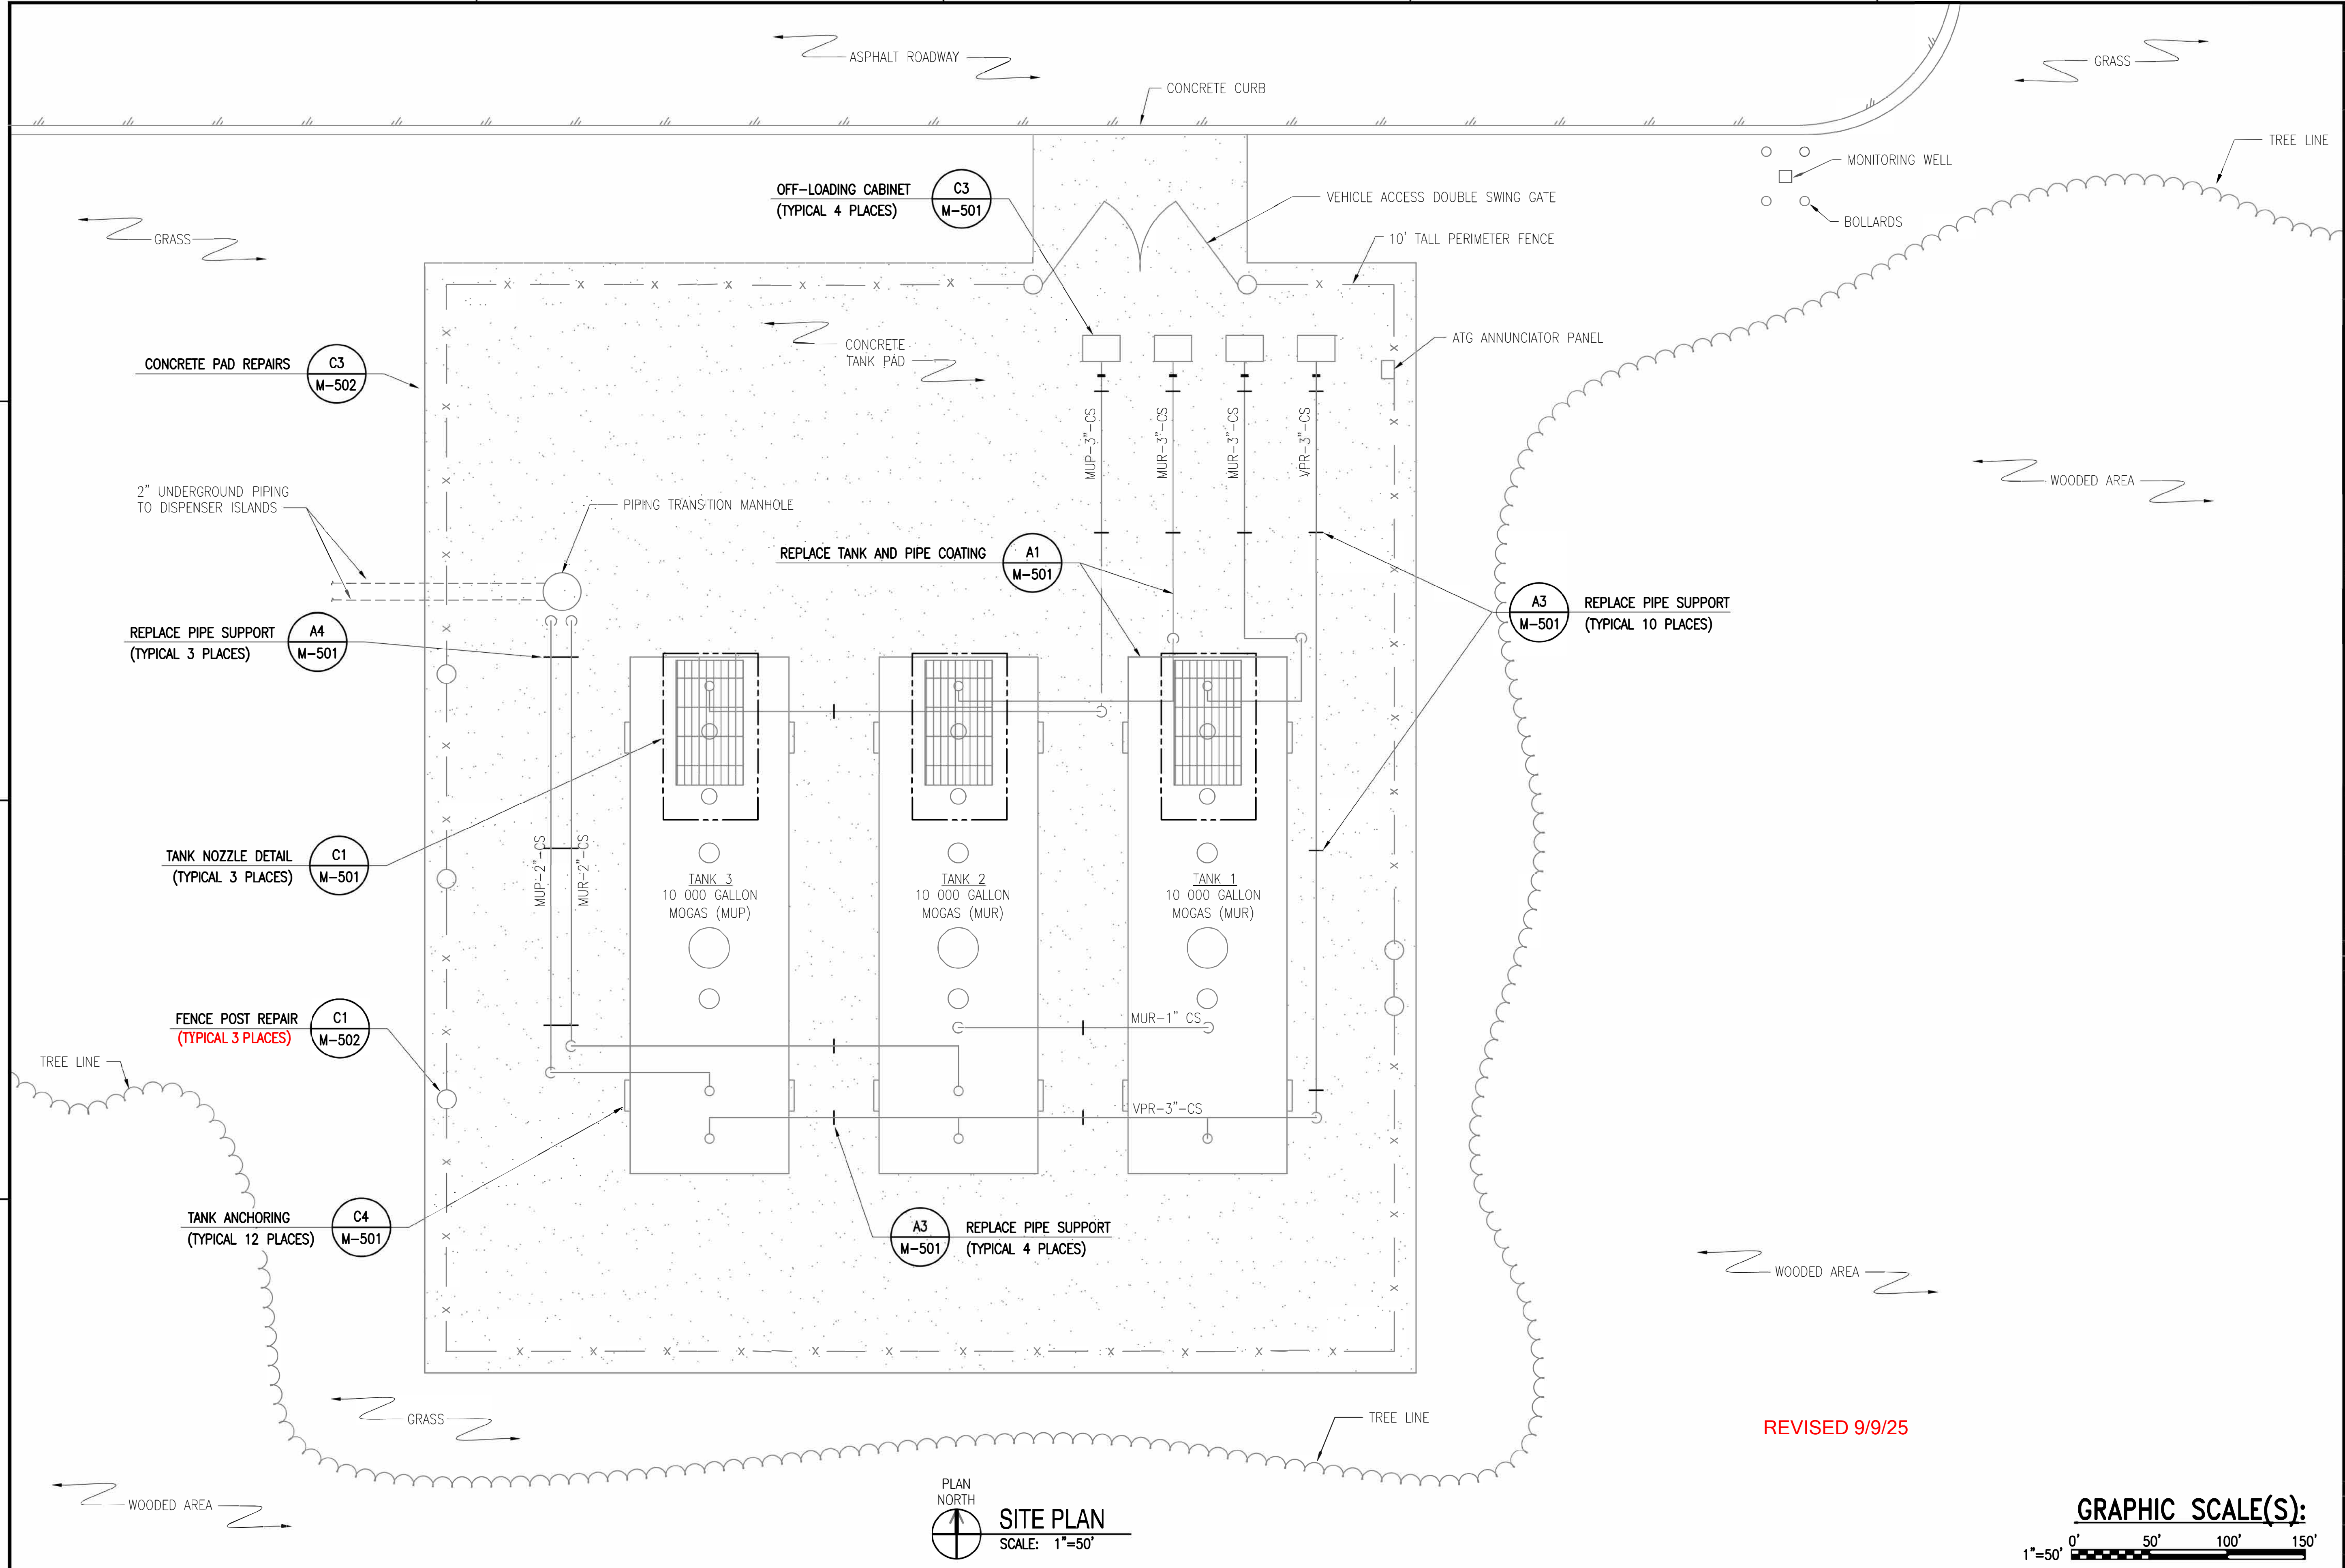

Response:

Reference NAVFAC Drawing 12858690 Detail C1 stating New Fence Post (Typical of 3). Reference revise NAVFAC Drawing 12858688 Site Plan Detail C1 stating Fence Post Repair (Typical 3 Places). Submit proposals in accordance with RFP, Specifications, Drawings and all amendments.

- B. This amendment also incorporates the following updated drawing:
