SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

Block 14 (Description of Amendment/Modification): A) The purpose of this amendment is as follows:

1. To provide answers to questions submitted by vendors
2. To correct grammatical errors in the CLIN structure

Vendors ensure you read, comply with any changes, sign the amendment and submit with your quote.

B) All other terms and conditions remain unchanged.

Section A - Solicitation/Contract Form

The following changes have been made:

Miscellaneous text in this section has been added to:

Roof Repairs, Inspections and Maintenance at Fort Buchanan, Puerto Rico

Questions received from Vendors

1. Is the contractor required to perform core cuts, moisture scans, or any additional diagnostic testing as part of the base contract, or will such testing be directed only under specific task orders?

As per Contract Specification Section 01 11 00 paragraph 3.3, Item c and Item d: (c) Roofing cores sampling and location within the roof, and testing to determine system components, and roofing system type. (d) Inspection for subsurface moisture contamination with Infrared Equipment, provide thermograms and exact location within the As-Built roof plan drawing.

2. Should contractors assume the presence of hazardous materials (e.g., asbestos, lead) within existing roof assemblies, or will the Government provide any known hazardous materials reports for the facilities?

Contractors shall not assume the presence of hazardous materials within existing roof assemblies unless otherwise identified by the Government.

Where hazardous materials such as asbestos are suspected or required to be verified, the Government will direct sampling and laboratory testing in accordance with Section 01 11 00 Part 3.3 e. Testing will be performed and compensated under the applicable line item in the Schedule of Prices.

If an unexpected discovery of Asbestos or Lead occurs, refer to Section 02 82 00 Part 1.3.2 and the Operations and Maintenance Plans Technical Exhibits 3 and 4. Notify the Contracting Officer if any previously untested building components suspected to contain asbestos are impacted by the work. Contractors should stop working in the affected area immediately after notification.

Although all known history of asbestos located on roof structures has been resolved to date, the asbestos plan should be taken into consideration for all task orders and put into action if any signs of asbestos are identified

3. Are the roof square footages listed in Attachment 3 considered final and Government-verified, or should contractors expect variations based on field measurements?

The roof square footage provided in Technical Exhibit 1 is estimated quantities for bidding purposes.

After award, contractors shall verify the dimensions and site conditions in the field in accordance with the task order issue at the time. Actual quantities may vary based on field measurements and existing conditions.

4. Is the Government aware of any ongoing or planned construction, renovation, or maintenance projects that may overlap with or restrict access to buildings included in this roofing requirement?

All facility access coordination will be performed by the Government on a task order by task order basis.

5. What buildings are considered to have Asbestos on the roof?

Refer to answer in question 2.

Section B - Supplies or Services & Prices or Costs
